Abdullah Muhammad Mushtaq

has successfully completed the online Professional Certificate

IBM Systems Analyst

By completing the IBM Systems Analyst Professional Certificate signifies the learner's comprehensive mastery of systems analysis and related IT skills. By successfully completing the program, the learner has gained expertise in the role of a systems analyst, including process modeling, requirements gathering, project and stakeholder management, and IT fundamentals. They have developed proficiency in data visualization and dashboards using Excel and Cognos, as well as IT systems design, analysis, software testing, deployment, and maintenance strategies. The learner has also explored innovative applications of generative AI for systems analysis and demonstrated their abilities through a capstone project, preparing them for a successful career in the field.
