Abdullah Muhammad Mushtaq

has successfully completed the online Professional Certificate

IBM IT Project Manager

By successfully completing the program, learners understand project management concepts, tools, principles, skills, mindsets, and language. They learned how to initiate a project and about the tools IT project managers use to lead a project successfully. Managing stakeholders along with communications and leadership skills were covered for project managers in detail. Learners are also able to manage project risks and drive the project toward success throughout the project lifecycle. They also utilized Agile and Scrum and wrote and executed Agile user stories. The holders of this certificate completed numerous hands-on labs and projects to gain practical experience and built a portfolio of projects demonstrating their proficiency for an entry-level role in IT project management.
